

## COIL SPRING COMPRESSOR

# KJ-914

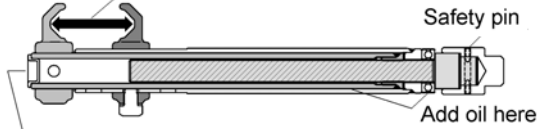

This is a spring compressor that can be clamped to the outside of struts with two hooks. The compact hooks and long stroke make this the ideal choice for almost any application! Non-slip hooks and a safety clutch contribute to safety as a top priority.

Applicable with all cars using struts, including Honda cars.  
Hook positions adjustable in 3 stages. Maximum stroke of 256 mm.  
Non-slip hooks with V-shaped cuts enable secure grip.  
Impact wrenches can be accommodated.  
Built-in safety clutch prevents danger from excessive loads.  
Product indemnity insurance provided.  
High-quality materials are topped by high-rigidity chrome plating finish.

### PARTS LIST

The stroke is the length of this section

This cap should be removed periodically and transmission oil added (about 10 cc).
