

FLUID LINE CLAMPER SET

KL-121

When various types of fluid lines (hoses) need to be disassembled and detached, the KL-121 series allows the fluid lines themselves to be clamped off, minimizing damage caused by leaking fluid. Kept as simple as possible, this tool is designed for easy, single-handed operation. Also, plates are kept completely parallel when used with the fluid lines, so that damage is kept to an absolute minimum.

Applicable sizes for various sets

Prod. Code	Appl. Size	Weight
KL-121-1	~ 10	41g
KL-121-2	~ 15	46g
KL-121-3	~ 25	101g
KL-121-4	~ 45	247g
