

# PB-TB series

Accurate bending of brake pipes!

The pipe bender is a dedicated tool that allows brake pipes to be bent easily, without being crushed.

- With the TB-5681 model, pipes are held with both hands and bent.
- With the PB-810 and PB-1215 models, the pipe is placed in a vise and bent.

Model	Applicable pipe outer diameter
TB-5681	copper : 5/6/8/10 mm Brake pipes : 4.76/6.35 mm
PB-810	8/10 mm (steel/copper/aluminum)
PB-1215	12/15 mm (steel/copper/aluminum)
