

## SLIDING HAMMER

### SH- 32 (3.2kg hammer)

These sliding hammers feature a brand-new design that goes above and beyond the ordinary safety mechanisms. The bead of the shaft is tapped with the inside part of the hammer, so you never need to worry about your hand taking the blow instead!

Shaft is pounded inside the hammer, so this tool is both safe and compact!

#### Specifications

Data	Hammer weigh	Stroke	Overall length	Screw size
SH-32	3.2 kg	192 mm	595 mm	M18 X P2.0
